Gluten-free fingerstache disrupt, scenester photo booth American Apparel you probably haven't heard of them locavore bespoke gentrify. Pour-over before they sold out four loko polaroid selfies, seitan deep v freegan sustainable wayfarers Austin slow-carb. Freegan ugh tofu, biodiesel literally mlkshk gluten-free iPhone banh mi try-hard whatever.

Experience

2013-Present   **Data Engineer at Narrative Science**

Short text containing the type of work done, results obtained, lessons learned and other remarks. Can also include lists and links:

- Data Science
- MongoDB
- AWS

2010-2013   **Associte Fellow at the Kavli Institute for Cosmological Physics**

Also with a short description.

2007-2010   **Postdoctoral Researcher at Leiden University**

Core member of the OverWhelmingly Large Simulations (OWLS) team.

- Played a leading role in developing the C code employed in one of the largest cosmological, hydrodynamic simulation projects ever performed, allowing the team to produce groundbreaking scientific papers.
- Led a variety of scientific projects on diverse topics and designed, performed and interpreted numerical experiments, publishing multiple high-impact papers.

Education

2010-2014   **PhD, Computational Astrophsics**; Durham University (UK)

Thesis title: Simulating molecular cloud regulated star formation in galaxies *Developed high-performance C code for the simulation of galaxy formation.

2007-2010   **MSci. Physics and Astronomy**; Nottingham (UK)

Technical Experience

Programming Languages

Python: Here, we have an itemization, where we only want to add descriptions to the first few items, but still want to mention some others together at the end. A format that works well here is a description list where the first few items have their first word emphasized, and the last item contains the final few emphasized terms. Notice the reasonably nice page break in the pdf version, which wouldn't happen if we generated the pdf via html.

C/FORTRAN: Description of your experience with second-lang, perhaps again including a **link**, this time placing the url reference elsewhere in the document to reduce clutter (see source file).

Basic knowledge of **Shell scripting**, **PHP**

Side Projects

For items which don't have a clear time ordering, a definition list can be used to have named items.

- Data visualization appeared in the Denver Post, Washington Post, Business Insider,
- Second item.
